**Act in Support of Ammunition Production (ASAP)**

**The ASAP proposal will facilitate the ramp-up of ammunition production capacity within the European Union, allowing the European defence industry to better support Ukrainian and Member States' armed forces.**

### Regulation on supporting ammunition production (ASAP)

On 20 July 2023, the Regulation on supporting ammunition production (ASAP) was adopted by the EU co-legislators. ASAP is a direct response to the European Council's call to urgently deliver ammunition, and if requested missiles, to Ukraine and to help Member States refill their stocks by introducing targeted measures in support of defence industry.

The Regulation was published in the EU Official Journal on 24 July and can be found at [European Commission](#).

## ENDR Conference “Human-Machine interfaces and Gaming Technologies in Defence” in Zagreb, 26-27 September, Registration open!

On **26-27 September** the **European Conference Human-Machine interfaces and Gaming Technologies in Defence** will take place in **Zagreb, Croatia**. The conference will address how digital technologies can be used in defence and what the benefits are for the battlefield. Human-Machine interfaces and gaming technologies, which are core technologies for simulations and trainings have key importance for defence, especially looking to the future. Many critical technologies for security and defence are increasingly originated in the civilian domain and use critical components of a dual-use nature.

The event will offer amongst others, the following opportunities:

- To provide a forum to businesses from all over Europe to connect through B2B meetings and pitches;
- To attend the live demonstrations and showcase examples in Human Machine interfaces and gaming technologies: Robotic vehicles, exoskeletons, drones, etc. on the 26 September.

The event is open for registration: [the agenda can be downloaded](#) and for registration, please visit [the website of the event](#).

**ENDR Conference “Skills in the defence sector”, in Stockholm, 12 December - Save the date!**

On **12 December the European Conference 'Skills in the defence sector' will take place in Stockholm, Sweden.** The conference will bring together European companies, authorities, academia, and research organisations to exchange views on the challenges related to the future availability of skills for Europe's defence industry and explore best practices and possible ways forward.

Specific topics will include:

- STEM – a key for the future
- Ensuring our future capabilities through an attractive defence sector
- Cross-border cooperation: Creating win-win situations
- A future outlook of skills

The event is open for registration: for further information and registration, please [click here](#).
